FROM OUR FAMILY TO YOURS

We pride ourselves on being a family-owned and operated company with over two decades of experience in gutter protection systems using products developed and manufactured in the USA. Keeping your home safe from gutter overflows and clogging is more than just protecting the exterior of your house, but also protecting what is most valuable on the inside – the health and safety for you and your family. We prioritize developing lasting relationships with our valued dealers so that they can consistently provide you with the highest quality products on the market. Our commitment is to provide you with reliable gutter solutions that address specific problems. We believe that there is no one-size-fits-all gutter protection and that is why we have crafted various solutions for you to choose what best solves YOUR unique needs.

THE HOME BEHIND THE ALUMINUM

Gutter Covers International's manufacturing plant is located just east of Cincinnati in Batavia, Ohio. We have a modern plant that is sophisticated with digitally controlled manufacturing equipment that is unparalleled – allowing us to be lean and efficient. Each and every rolling foot of aluminum is carefully and consistently crafted.

YOUR SOLUTIONS

Gutter Topper®

When It Pours, It Reigns.®

When leaves and debris back up exposed gutter systems, it can produce a breeding ground for mosquitoes and other pests that carry unwanted diseases. With Gutter Topper® safely installed right over existing gutters, water flows naturally and clings to its unique curved “nose” where it is deposited into slots at the bottom of the system. Leaves and debris remain on Gutter Topper’s flat surface and blow harmlessly to the ground once they dry. It is our toughest and best-selling product that is durable and hassle-free.

*Will not void your shingle warranty

THE LEAF TERMINATOR®

Outthinking Mother Nature™

Autumn is one of the most beautiful seasons with the leaves changing colors and falling gently to the ground – and possibly in your gutter system as well! The Leaf Terminator® lets you enjoy the changing seasons with its patented design and features our exclusive .096in perforation pattern. The Leaf Terminator allows water to flow fluidly through the perforations while stopping leaves and debris from clogging up the gutter system.

*Will not void your shingle warranty

THE SOLUTION®

The Cost-Effective Gutter Protection System™

Gutter protection is crucial to maintaining structural integrity to both the outside and inside of the home. We developed The Solution® to be versatile and affordable, while protecting against clogs from debris. It is designed with .125in perforated holes and the low profile design makes it virtually invisible from the ground. The Solution is available in three different sizes to accommodate any roof style.

NEEDLE GUARD™ FOR THOSE ... LITTLE THINGS IN LIFE.

Having pine trees near your house can be nice, but aggravating. Pine needles can quickly cause clogs in exposed gutter systems resulting in mold, mildew and rot. This is why we specifically designed Needle Guard™ which covers existing gutters with .045in micro-perforated holes in high-quality aluminum. The micro-perforations allow rainwater to flow into the gutter while dispelling pine needles.

*Will not void your shingle warranty

**TOP
GUARD**

All Roof Style Compatible

If you're looking for a budget-friendly gutter protection system with superior strength, Top Guard is our go-to solution. Top Guard provides protection in two different ways: its unique pattern creates surface tension to help water to cling to the surface and flow into the gutters and it prevents leaves and debris from clogging gutters using our smallest perforation pattern at .070in.

*Will not void your shingle warranty

THE VERSATILE SOLUTION™

An Economical Gutter Protection System

Cleaning your gutters is not usually the most sought after chore to do, typically because it involves climbing up a high ladder multiple times to clear out clogged gutters. Not maintaining gutters every few months can cause mold, mildew and rot that might not be visible from the outside. The Versatile Solution™ is an economical gutter protection solution designed for under the shingle installation. It protects against clogs from debris and its low profile design makes it virtually invisible from the ground.

*Will not void your shingle warranty

OUR ENHANCEMENTS

ICE DAM SOLUTION™

Prevent the Winter Ice Burden

Heavy ice and snow buildup on gutters may not seem like a problem, but when it begins to melt, ice damming can occur. Ice damming is the result of a continuous cycle where snow on your roof begins to melt and the water runs down to the roof edge where it refreezes in your gutters. It continues to build until it eventually backs up under the shingles. Ice Dam Solution™ is a self-regulated heat cable that fits snugly under upper shingles. It warms the shingles so that water does not freeze on that part of the roof causing ice problems. The amount of heat produced fluctuates based on the temperature outside, preventing ice damming and icicles from forming.

HOTT TOPPER™

Tested to be the best, hotter than the rest!

When snow and ice collects on top of a gutter system, the weight can cause the supports and gutters to actually pull away from the home over time. Hott Topper™ was created to work in conjunction with Gutter Topper®. It keeps the water and snow from freezing on top of the Gutter Topper by using a self-regulated heat cable encapsulated on the gutter cover. Perilous icicles will not have a chance to hang over your head with a self-regulated heating cable that keeps water flowing without allowing it to freeze.

B1 & B2 DIVERTERS

All of our gutter solutions are designed and tested to handle tremendous amounts of rain water, but having the patented design of the B1 and B2 Diverters allows water to flow effortlessly into the gutter system and prevents any chance of gutter overflow. Depending on the type of roof you have will determine which Diverter will be the best solution. B1 Diverter has a patented reverse curve that works best with homes that have steep roofs while B2 Diverter has a tapered extension and lip that is used on low pitched roofs.

OUR COMMITMENT TO YOU

- 
- A photograph of a family of four walking outdoors on a paved path. A man with dark skin and curly hair, wearing a grey cardigan over a maroon shirt and jeans, holds the hand of a young boy on his left. The boy is wearing a grey t-shirt and jeans, and is smiling. A woman with short dark hair and glasses, wearing a black cardigan over a white top and jeans, holds the hand of a young girl on her right. The girl is wearing a grey dress, a striped scarf, and red boots. They are all walking towards the right. The background is a plain white wall. In the foreground, there is a patch of green grass.
- We only use the best-of-the-best products with no blemishes
 - We are quality and results driven
 - We create various solutions for different needs
 - We care about long-term solutions and relationships
 - We do everything as if it was for our own homes and families
 - We treat others as we would want to be treated

AN EXAMPLE PROCESS OF HAVING A GUTTER PROTECTION SYSTEM INSTALLED*...

1. Find a dealer in your area
2. The dealer will visit your house for a consultation and scope the work
3. Dealer will draft a quote for your review
4. If approved, your chosen gutter protection system will be installed
5. Enjoy peace of mind by never having to climb a ladder to clean your gutters

Are you ready to protect your home and have peace of mind that your gutters are covered?
Contact Gutter Covers International today and get connected with a local, experienced dealer to start the process.
