YOUR SOLUTIONS

Gutter Topper®

When It Pours, It Reigns.®

When leaves and debris back up exposed gutter systems, it can produce a breeding ground for mosquitoes and other pests that carry unwanted diseases. With Gutter Topper® safely installed right over existing gutters, water flows naturally and clings to its unique curved “nose” where it is deposited into slots at the bottom of the system. Leaves and debris remain on Gutter Topper’s flat surface and blow harmlessly to the ground once they dry. It is our toughest and best-selling product that is durable and hassle-free.

*Will not void your shingle warranty

THE LEAF TERMINATOR®

Outthinking Mother Nature™

Autumn is one of the most beautiful seasons with the leaves changing colors and falling gently to the ground – and possibly in your gutter system as well! The Leaf Terminator® lets you enjoy the changing seasons with its patented design and features our exclusive .096in perforation pattern. The Leaf Terminator allows water to flow fluidly through the perforations while stopping leaves and debris from clogging up the gutter system.

*Will not void your shingle warranty

THE SOLUTION®

The Cost-Effective Gutter Protection System™

Gutter protection is crucial to maintaining structural integrity to both the outside and inside of the home. We developed The Solution® to be versatile and affordable, while protecting against clogs from debris. It is designed with .125in perforated holes and the low profile design makes it virtually invisible from the ground. The Solution is available in three different sizes to accommodate any roof style.

NEEDLE GUARD™

FOR THOSE ... LITTLE THINGS IN LIFE.

Having pine trees near your house can be nice, but aggravating. Pine needles can quickly cause clogs in exposed gutter systems resulting in mold, mildew and rot. This is why we specifically designed Needle Guard™ which covers existing gutters with .045in micro-perforated holes in high-quality aluminum. The micro-perforations allow rainwater to flow into the gutter while dispelling pine needles.

*Will not void your shingle warranty

GUARD**

All Roof Style Compatible

If you're looking for a budget-friendly gutter protection system with superior strength, Top Guard is our go-to solution. Top Guard provides protection in two different ways: its unique pattern creates surface tension to help water to cling to the surface and flow into the gutters and it prevents leaves and debris from clogging gutters using our smallest perforation pattern at .070in.

*Will not void your shingle warranty

THE VERSATILE SOLUTION™

An Economical Gutter Protection System

Cleaning your gutters is not usually the most sought after chore to do, typically because it involves climbing up a high ladder multiple times to clear out clogged gutters. Not maintaining gutters every few months can cause mold, mildew and rot that might not be visible from the outside. The Versatile Solution™ is an economical gutter protection solution designed for under the shingle installation. It protects against clogs from debris and its low profile design makes it virtually invisible from the ground.

*Will not void your shingle warranty

FAQ'S

WHERE IS THE PRODUCT MANUFACTURED?

We're proud to say our products are manufactured right here in the good old U.S.A. Our 43 thousand square foot manufacturing plant is located just outside of Cincinnati, Ohio. The product is formed with sophisticated digitally controlled roll forming machines and each piece is personally inspected and approved by specially trained employees. In fact, they initial each and every box showing that they stand behind the product's integrity.

HOW DOES IT WORK?

- A.** When using Gutter Topper, it's a principle of physics. When it rains, the water runs down your roof and over the gutter protection. Because of surface tension, the water travels around the specially designed nose of the product, into your gutters. As an example, take a glass and place it sideways under the facet, turn on the water and you will see the water split in both directions going around the glass and then meeting from both sides at the bottom of the glass.
- B.** For products that are perforated, the water runs down the roof, onto the gutter protection and through the perforated holes. This allows the rainwater in but not the leaves or debris.
-

WILL THIS WORK ON ANY TYPE OF ROOF OR GUTTER?

In most cases, Gutter Topper can be installed on any type of roof or gutter. The product was designed to work with all types of roof designs and gutter systems. To be sure, contact the local Gutter Topper representative in your area. Contact a retailer near you.

WHAT DOES THE PRODUCT WARRANTY COVER?

Our products carry transferable paint warranties that vary by product. Check with your local gutter covers retailer for information. There are terms and conditions as with any warranty.
